F150 • mobile solar PV generator

iKube is a ready-to-use mobile solar generator able to guarantee up to 4 kW mains power supply, and has been developed for use by emergency services, and those working in civil defence, disaster relief and international aid programs.

Designed to provide energy security in areas not covered by the grid, or in the event of a grid failure, iKUBE works even in the absence of sunshine due to its integral battery storage system. It offers the advantages of compactness, low noise, no fumes, no physical fuel supply needed as well as protection from rising diesel fuel costs.

Technical Specification

Space req'd (Closed): 1.27 x 1.27 x 1.20m
Space req'd (Open): 3.13 x 2.57 x 2.28m
Max Weight: 500 Kg

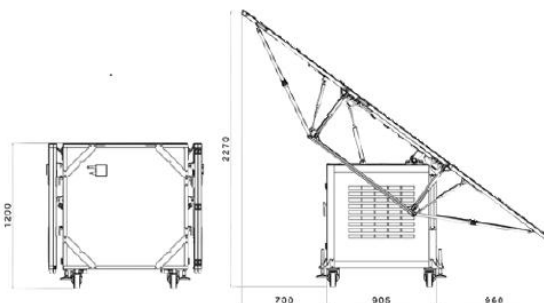

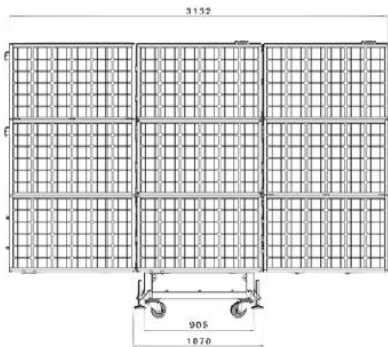

Inverter power: 2/3/4 KWp
Output Voltage: 110/220VAC 50/60Hz
Battery Capacity: 200/220/245/400Ah
Max System Voltage: 24/48 V
Type: AGM/GEL

PV Panels: Poly/Mono Crystalline
Quantity: 9 (1.0 x 1.0m)
Power: 1.3/1.35/1.4 kW

Battery Run Time

Power (W)	Remaining Hours
100	174
500	24
1000	10
1500	6
2000	4
2500	3
3000	2.5

(Expressed as number of hours remaining with NO sunlight or further recharging)

Optional purpose-built trailer also available
